Re: Updates

-
- **ACR Re-accreditation for CT** – Eden Maxwell and Andrea Lillie are working on the re-application for CT ACR accreditation. We have collected 2 of the 3 cases to submit. We still need an adult (over 16 years) C spine for trauma. Keep your eyes open for an opportunity to perform one of these and let Eden know as soon as possible.
 - **MR safety** – The security codes on the doors to the MR/CT/Sedation area are an important safety feature for the MRI safe zones as described by the ACR white paper. Please do not share the security code with anyone. The code is given to those who have had MR safety training.
 - **Riverside PowerScribe upgrade and Synapse training** – Mark George of Riverside is coming to train us on the Synapse PACS. He also has let us know that tentatively on August 21st, Riverside will be upgrading from PowerScribe 5 to PowerScribe 360. Voice modeling will need to be completed, as well as a brief tutorial. At this time, he is planning to be in Dayton on August 2 and then again on an additional date. A training schedule will be created and sent to you. He has forwarded some training information for us to look at in advance as well.
 - **PowerScribe templates** – Please forward any modifications you would like to see in the PowerScribe templates to Peggy Wiggins and me. We would like to update them before October 1.
 - **Home PACS stations** – April Madden needs the serial numbers off the monitors and PC for all the home PACS stations. If you have yet done so, please send her the serial numbers she needs as soon as possible.
 - **Next radiologist meeting** – Monday, September 24 at 12:30 pm in the **Radiology Conference room**. If you have an agenda item to discuss, please forward it to me in an e-mail. Lunch will be provided.
